Sewing Cabinet

Sewing machine not included.
Specific machine model number required for platform preparation.

SpaceSaver Sewing Cabinet – Side Seating

35004 & 35006 SpaceSaver Sewing Cabinets

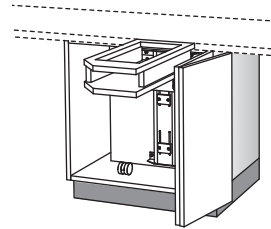

The 35004 and 35006 SpaceSaver side seating sewing cabinets are designed to maximize efficient use of floor space. Machine orientation is needle-left (adjacent to the side counter). The assist lift mechanism places the sewing platform top flush with the adjacent side counter area. The entire adjacent counter surface can be used to support or provide working space for garments or projects being sewn. The total 45" dimension from the wall to the right edge of the sewing platform minimizes conflict of aisle passage and provides efficient floor space usage.

35006

Sewing Cabinet – Front Seating

35000 & 35002 Sewing Cabinets

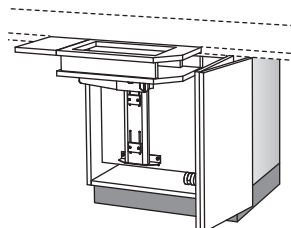

When front face seating is required, the 35000 and 35002 platform orientation allows for adjacent rear counter space as a convenient surface for garments or projects being sewn. Needle-left position has convenient front feed and platform extension to the left. Assist lift brings the sewing platform top flush with rear counter surface. The front orientation has seating of operator in the aisle area. Though not as space-efficient as SpaceSaver side seating, the 56" operator-to-wall dimension is a convenient usage of aisle space.

Pullout Sewing Cabinet – Side Seating

**35008 & 35010
Pullout Sewing Cabinets**

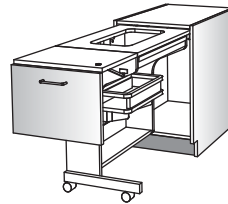

The 35008 and 35010 sewing cabinets are designed for right side operator seating. The cabinet front folds out to provide convenient sewing platform extension to the operator's left. These models provide solutions for both flatbed and free-arm machines with convenient assist lifts. The 67" total extension from the wall when in use requires adequate floor area and aisle clearances.
