LOCKERS – TYPE I

Features

TYPE I: OPEN INDIVIDUAL LOCKERS

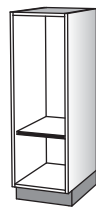

Application of Type I is compatible with all Stevens Advantage Series. Type I includes a coordinated offering of lockers, pack cubes, wall lockers and wall hook rails. Both flat top and slope top designs are available. Several designs include an upper storage compartment.

TYPE I: CABINET DIMENSIONS

Stevens Advantage lockers are designed so that all locker compartments in a cabinet are the same width. This provides the same amount of storage space for each user. As a result, some actual cabinet widths vary from those of standard casework.

Model Number System

MODEL NUMBER DEFINED

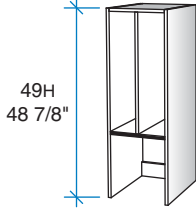

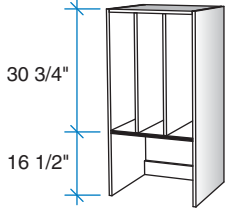

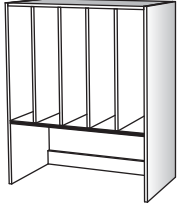

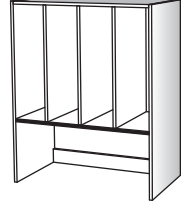

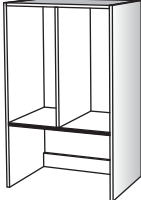

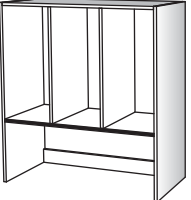

Lockers are defined using the 5-digit model number associated with the design illustration. The complete unit definition requires the width, height, and depth suffix to properly identify the locker desired.

HOW TO ORDER

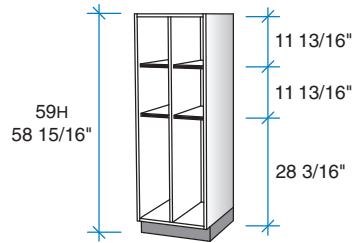

To order a locker, provide the model number, followed by the desired nominal width, nominal height, and nominal depth, chosen from the available sizes listed.

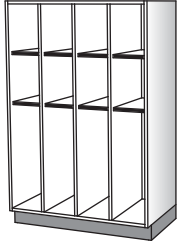

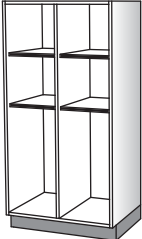

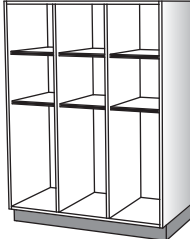

For example, to order a 62452 locker that has 9"-wide compartments and is 84" high by 21" deep, specify:
62452208421

SLOPE TOP

Stevens Advantage slope top units are designed with integral slope ends, eliminating the need for on-the-job fabrication of slope structures. Overlay slope cover panels are shipped with length and end edging for final fit and sizing as installation field conditions may require. Stevens Advantage slope design incorporates a full 3/4" thick slope top on a 25° constant rising slope. Slope top options are available on nominal cabinet depths of 14", 18", 21", and 24". Slope tops not recommended for cabinet height above 84", due to possible ceiling interferences. 26816 Slope Top Cover Panels must be specified and ordered separately (not included with cabinet units).

Nominal Unit Depth	Rise	
	inches	mm
14	7	177.9
18	8 3/4	222.6
21	10 3/8	262.8
24	11 1/2	292.8

Design Details

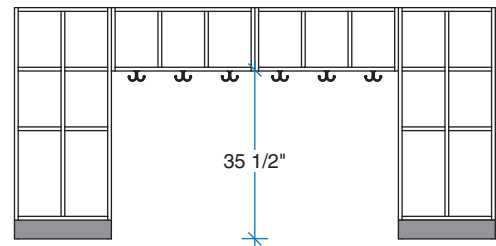

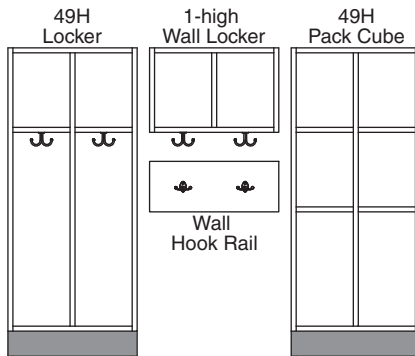

LOCKER ELEMENTS

The Stevens Advantage Type I locker offering includes integrated component elements, including lockers, wall lockers, wall hook rails, and pack cubes. Both flat top and slope top designs are available.

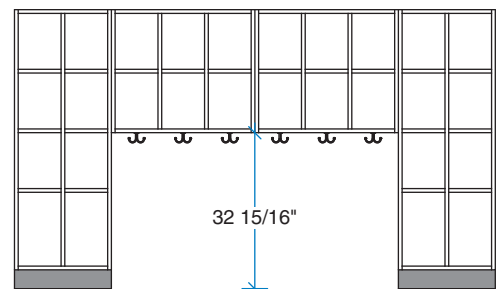

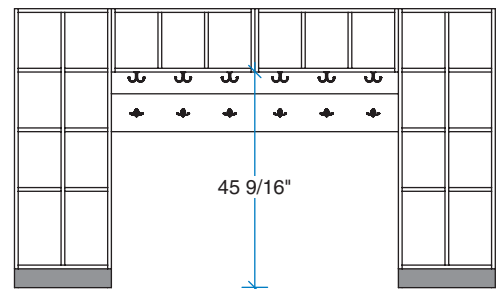

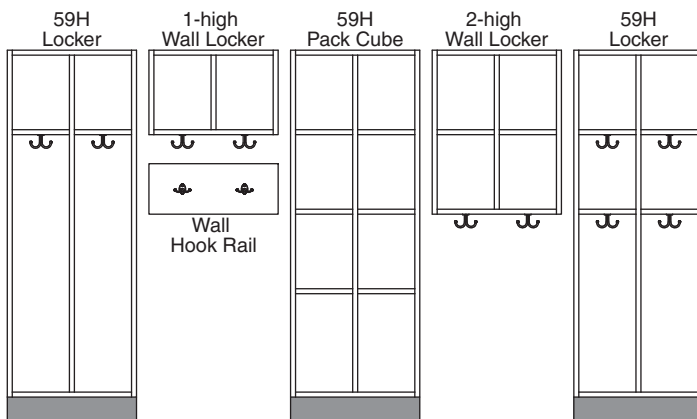

Locker compartment heights, widths, and depths allow equal and symmetrical applications. Mixing and matching compartment width to functional use can also be achieved when differences in end use dictate. For example, the use of larger 11"-wide pack cube compartments with narrower individual locker compartments (i.e., 8"-wide) can provide an adequate quantity of lockers in a constrained space.

The Stevens Advantage Gallery hook collection provides coordination of finish and style.
