Model Illustrations

MODEL NUMBER DEFINED

Cabinets are defined using the 5-digit model number associated with the design illustration. The complete unit definition requires the width, height and depth suffix to properly identify the cabinet desired.

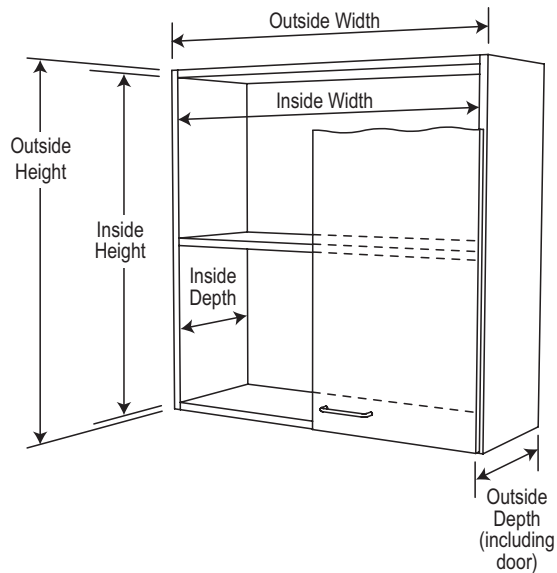

HOW TO ORDER

To order a cabinet, provide the model number, followed by the desired nominal width, height and depth, chosen from the available sizes listed.

For example, to order a 15129 cabinet that is 36" wide by 25" high by 14" deep, specify:
15129362514

WALL

Cabinet Dimensions Wall

WALL CABINET HEIGHTS

Nominal Height Outside (in.)	Nominal Height Outside (mm)	Actual Height Outside (in.)	Actual Height Inside** (in.)

BLIND CORNER ALIGNMENT**

Wider units than 18" or 15" may be applied and still maintain alignment.

Pull Orientation

Stevens Advantage cabinets are available with either vertical or horizontal pull orientations.

VERTICAL PULL ORIENTATION (standard)

Drawer pulls are centered (top to bottom, left to right) on drawer fronts.

HORIZONTAL PULL ORIENTATION

Pulls on top drawers align with pulls on full-height base doors.

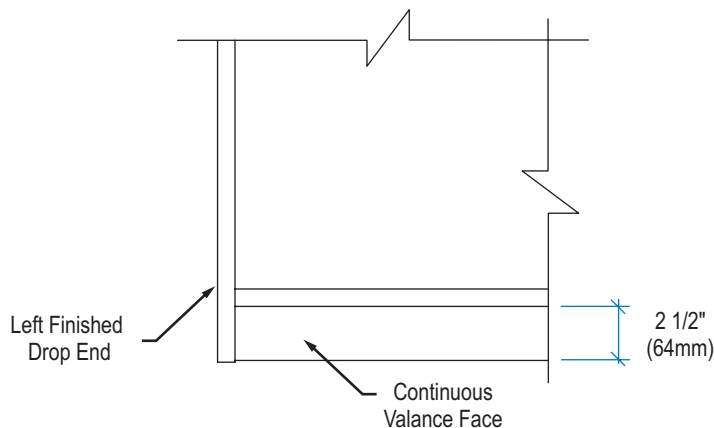

All drawer pulls are positioned the same.

Not recommended for recessed pulls.

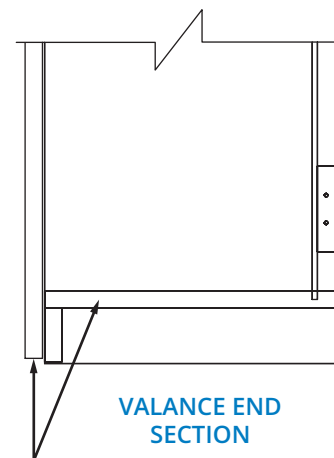

VALANCE

Stevens Advantage valance, slope valance and valance with attached soffit units are designed to allow continuous valance aprons under wall units. A finished end/drop left or drop right indication lowers the designated end panel to align with the valance rail. Field cutting of intermediate sides is not required to install under-cabinet valance lighting. Return corners are not required upon installation.

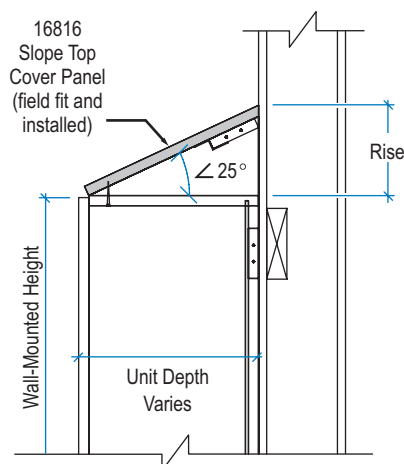

LEFT FRONT CORNER

Because cabinet bottom is set up in relation to door bottom edge, exposed hinges will not align with conventional cabinet hinge locations. Pulls and locks will not align with conventional pull and lock locations.

SLOPE TOP

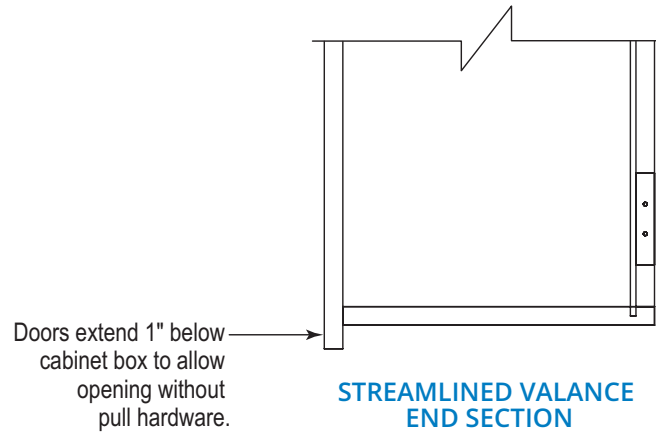

Stevens Advantage slope top units are designed with integral slope ends, eliminating the need for on-the-job fabrication of slope structures. Overlay slope cover panels are shipped with length and end edging for final fit and sizing as installation field conditions may require. Stevens Advantage slope design incorporates a full 3/4" thick slope top on a 25° constant rising slope. Slope top options are available on nominal cabinet depths of 14" and 18". Slope tops not recommended for wall-mounted height above 84", due to possible ceiling interferences. 16816 Slope Top Cover Panels must be specified and ordered separately (not included with cabinet units).

Nominal Unit Depth	Rise	
	inches	mm
14	7	177.9
18	8 ¾	222.6

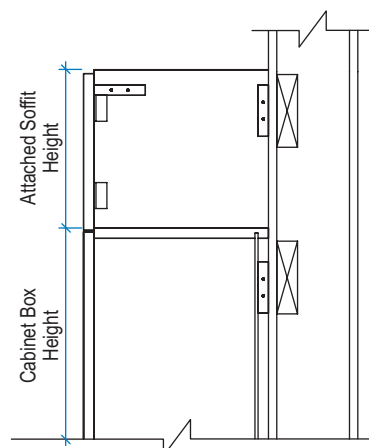

STREAMLINED VALANCE

Stevens Advantage streamlined valance units are designed the same as wall cabinets, except the doors extend 1" below the cabinet box to allow opening without the need for pull hardware.

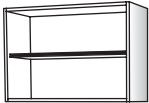

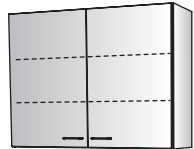

ATTACHED SOFFIT

Stevens Advantage attached soffit units are designed with integral soffit ends, eliminating the need for on-the-job fabrication of soffit structures. The soffit panels align with door reveals and can be removed for easy installation. Cabinet support rails in the upper section are set down to allow for easy adjustment of the end panels for the perfect fit. Soffit heights are set to 12" as a default but can be specified from 6"-18" high in 1" increments.
