MODEL ILLUSTRATION

MODEL NUMBER DEFINED

Cabinets are defined using the 5-digit model number associated with the design illustration. The complete unit definition requires the width, height and depth suffix to properly identify the cabinet desired.

HOW TO ORDER

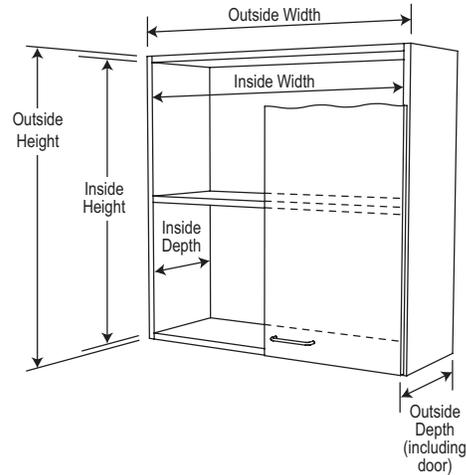

To order a cabinet, provide the model number, followed by the desired nominal width, height and depth, chosen from the available sizes listed.

For example, to order a 45129 cabinet that is 36" wide by 25" high by 17" deep, specify:

45129362517

CABINET WIDTHS (BWT)

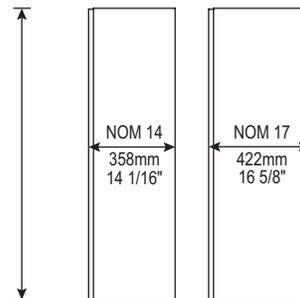

Actual Width Outside (in.)	Actual Width Outside (mm)	Actual Width Inside (in.)

VALANCE

Advantage Scientific valance units are designed to allow continuous valance aprons under wall units. A finished end/drop left or drop right indication lowers the designated end panel to align with the valance rail. Field cutting of intermediate sides is not required to install under-cabinet valance lighting. Return corners are not required upon installation.

LEFT FRONT CORNER

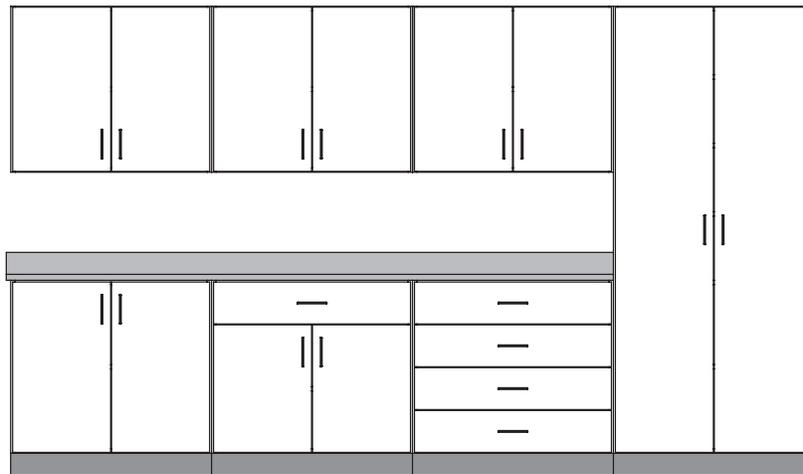

Because cabinet bottom is set up in relation to door bottom edge, exposed hinges will not align with conventional cabinet hinge locations. Pulls and locks will not align with conventional pull and lock locations.

PULL ORIENTATION

Advantage Scientific cabinets are available with either vertical or horizontal pull orientations.

VERTICAL PULL ORIENTATION (Standard)

Drawer pulls are centered (top to bottom, left to right) on drawer fronts.

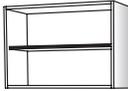

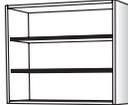

HORIZONTAL PULL ORIENTATION

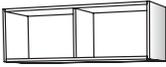

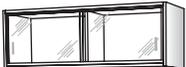

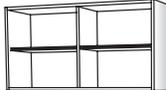

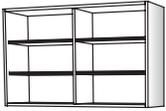

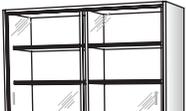

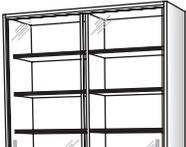

Pulls on top drawers align with pulls on full-height base doors.

All drawer pulls are positioned the same.

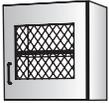

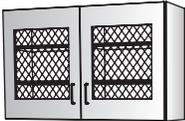

Not recommended for recessed pulls.
