COUNTERTOPS

Commercial Cabinetry and Millwork

Stevens Industries, Inc., from its initial founding in 1956, has provided a complete solution of cabinets and countertops fabricated and coordinated as a full product offering. Stevens Advantage countertops, included with the wide range of cabinets and millwork, can complete the entire project's requirements. Countertops are available in several versions of laminate, solid surface (polymer), epoxy resin, hardwood, stainless steel, phenolic, granite, marble and quartz. The following technical descriptions and design data illustrate the available designs. Beyond those shown, Stevens Millwork can also provide unique special applications.

GLOSSARY OF TERMS:

3mm Edge: Edge with high impact 3mm (1/8") thickness extrusion (patterns available from Stevens standard offering)

90° Postform: Seamless formed High Pressure Laminate wrapped over a 90° radius profile (eliminates brown edges and separate applied edge strips)

180° Postform: Seamless formed High Pressure Laminate wrapped over a 180° profile (eliminates brown edges and separate applied edge strips)

Backer: Back underside faced with laminate backer

Chemsurf: Chemical resistant laminate

HGS: Horizontal Grade Standard

HPL: Face surfacing in High Pressure Laminate

Integral Cove: Backsplash with a concave formed seamless intersection between countertop and backsplash

Marine Edge: Raised outside countertop edge

MDF: Medium Density Fiberboard

NAF: No Added Formaldehyde

Self Edge: Edges laminated with same High Pressure Laminate as countertop face

TFL: Thermally Fused Laminate

TSCA: Toxic Substances Control Act

WD00 HARDWOOD

- Fabricated from laminated kiln dried hard maple lumber
- Industrial grade with butt joints and edge grain fabrication (butcher block) design
- Edges sanded smooth with top and bottom corners broken
- Faces and edges sealed with varnish finish

Series/Core Code:
WD00S   Solid hard maple

WD00S available countertop thicknesses:
38mm (1-1/2")
44mm (1-3/4")

Note: Laminated maple lumber tops are susceptible to changes due to moisture, heat and cold conditions. Warpage and edge splitting may occur under unusual field conditions. Wood tops should only be delivered and installed after project HVAC systems are working and balanced for normal interior conditions. Never store or use in high or low humidity with cyclical conditions.
