SLOPE HUTCH

Commercial Cabinetry and Millwork

Hutch units are built for stacking on a countertop surface. Actual hutch heights are based on overall total height of elevation with the base and countertop combination used. Slope top units require 16816 slope top cover panel for field installation. Height (H) denotes cabinet box height.

SLOPE TOP

Stevens Advantage slope top units are designed with integral slope ends, eliminating the need for on-the-job fabrication of slope structures. Overlay slope cover panels are shipped with length and end edging for final fit and sizing as installation field conditions may require. Stevens Advantage slope design incorporates a full 3/4" thick slope top on a 25° constant rising slope. Slope top options are available on nominal cabinet depths of 14", 18", 21", and 24". Slope tops not recommended for wall-mounted height above 84", due to possible ceiling interferences. 16816 Slope Top Cover Panels must be specified and ordered separately (not included with cabinet units).

Nominal Unit Depth	Rise	
	inches	mm
14	7	177.9
18	8 3/4	222.6
21	10 3/8	262.8
24	11 1/2	292.8
